ROBOTICS IN PHARMACEUTICAL MANUFACTURING

Chemical College of Pharmacy, Solapur

Abstract :-
Advanced pharmaceutical manufacturing technologies have the potential to make substantial contributions, offering reduced waste, cost, and cycle time. However, the widespread adoption of advanced manufacturing technology has been hindered by economic obstacles, automated manufacturing processes, robotic technology, and other challenges, and opportunities for pharmaceuticals to support industry and manufacturing control (MCS) activities in the pharmaceutical industry.

The ability of modern technology to reduce waste, cost, and cycle time is a key factor in the adoption of advanced manufacturing technology. However, the widespread adoption of advanced manufacturing technology has been hindered by economic obstacles, automated manufacturing processes, robotic technology, and other challenges, and opportunities for pharmaceuticals to support industry and manufacturing control (MCS) activities in the pharmaceutical industry.

Abstract:
Advanced pharmaceutical manufacturing technologies have the potential to make substantial contributions, offering reduced waste, cost, and cycle time. However, the widespread adoption of advanced manufacturing technology has been hindered by economic obstacles, automated manufacturing processes, robotic technology, and other challenges, and opportunities for pharmaceuticals to support industry and manufacturing control (MCS) activities in the pharmaceutical industry.

Introduction:
The pharmaceutical industry is a highly competitive and regulated industry. The industry is characterized by high R&D costs, long development cycles, and high regulatory requirements. The industry is also characterized by high capital costs and high operating costs. The industry is also characterized by high risk and high uncertainty.

Conclusion:
The pharmaceutical industry is a highly competitive and regulated industry. The industry is characterized by high R&D costs, long development cycles, and high regulatory requirements. The industry is also characterized by high capital costs and high operating costs. The industry is also characterized by high risk and high uncertainty.
