

State Level Seminar Cum Workshop Lokmangal Science and Entrepreneurship College, Wadala

A State Level Seminar cum Workshop on “Biotechnology in the Diagnosis and Management of plant Virus Diseases” was organised by Lokmangal Science and Entrepreneurship College in collaboration with Punyashlok Ahilyadevi Holkar Solapur University, Solapur. The event was held from 26th – 28th February, 2024 at Lokmangal Science and Entrepreneurship College, Wadala. This event, aimed to address the pressing issues associated with virus diseases in economically important crops in Solapur district, while also empowering participants with the requisite skills and knowledge to tackle these challenges effectively. The event featured renowned speakers from national research institutes and academia who shared their profound insights on the seminar's theme. Their expertise and experiences provided valuable perspectives, enriching the discourse and enhancing participants' understanding of the subject matter. The Seminar cum Workshop witnessed active participation from various colleges, with a total of 105 participants including students, research scholars and faculty members enrolled for the event. Throughout the three-day duration, attendees engaged in various scientific and workshop sessions focused on the diagnosis and biotechnological solutions for virus diseases in economically important crops.
